## About us

We are an independent funeral directors with branches across Berkshire and South Oxfordshire. Founded in 1826, we are one of the oldest family businesses in Berkshire and remain family owned and operated today. We are proud of our heritage and use the experience and knowledge this has given us to serve you and our local community.

Our compassionate and professional team are there to help you with all aspects related to a funeral. From pre-planning, to arranging the funeral itself, to bereavement aftercare and even monumental masonry and memorialisation, we offer choice and flexibility so we can deliver the right options for you. We are committed to providing high standards of service, showing care and respect in all we do.

Recognising that needs change, we believe it's important to innovate. In 2010 we created MemoryGiving.com to allow families and friends to make in-memory donations and leave messages online. To date we have helped collect over £14m for charities, and enabled charities to receive a further £2.5m through Gift Aid as well as connect donor messages of support to nearly 80,000 bereaved families.

Continuing to look forward we are committed to being carbon neutral by 2026, our 200th business anniversary. As a generation that considers themselves custodians of both a business and a planet, we wish to lead efforts to deliver funeral services that are environmentally sustainable, and we now measure the impact of all that we do. Current investments include the introduction of electric cars and use of solar energy.
